

Professional Summary

Java Full Stack Developer with **3.5 years of IT experience** across the analysis, design, development and testing phases of the Software Development Life Cycle. Built backend services and a frontend portal for **EV-charging Business Support Systems** on J2SE/J2EE, and a full-stack **inventory management** application with React, Redux, Spring Boot and MongoDB. Hands-on with **Spring Boot, Spring MVC, JPA/Hibernate and RESTful web services**, client-side technologies (React, Angular, JavaScript, JSON, jQuery) and AWS. Experienced in Agile and Waterfall delivery, CI/CD with Jenkins and Maven, debugging with SLF4J/Log4j and Kibana, and testing with JUnit and Mockito. Able to plan, coordinate and execute project activities to ensure on-time delivery.

Technical Skills

Languages	Java, SQL, JavaScript
Backend	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, J2EE, REST & SOAP Web Services, Microservices
Frontend	React JS, Angular, Redux, JSP, HTML, CSS, JavaScript, jQuery, JSON
Databases	MongoDB, MySQL, Oracle
Cloud & DevOps	AWS, Jenkins (CI/CD), Maven, Git, GitHub
Testing & Quality	JUnit, Mockito, Postman, SonarQube
Logging & Monitoring	SLF4J, Log4j, Kibana
Design Patterns	MVC, DAO, Singleton, Factory, Microservices design patterns
Methodologies	Agile (Scrum), Waterfall, SDLC

Professional Experience

11/2023 – Present Hyderabad, India	EVGateway India Private Limited, Software Developer - Develop and maintain backend services (EVG-Server) and frontend portal features (EVG-Portal) for an EV-charging Business Support System built on J2SE/J2EE and Spring Boot. - Perform requirement analysis, design and implementation of Java code per project requirements. - Write RESTful services using Spring REST Controllers; consume SOAP and RESTful web services. - Implement database logic using Hibernate and Spring JPA. - Integrate OCPP and OCPI protocols to connect charging stations, operators and roaming partners. - Create and manage Jenkins jobs for CI/CD pipelines; build with Maven and deploy on AWS. - Debug with SLF4J and Log4j and analyse application logs in Kibana to resolve issues quickly. - Write unit and integration tests using JUnit and Mockito; maintain code quality with SonarQube. - Identify and fix bugs reported during testing and production. - Conduct code reviews and check-ins using Git/GitHub; track tasks and bugs in Jira in Agile sprints.
07/2022 – 03/2023 Hyderabad, India	Cognizant Technology Solutions Pvt. Ltd., Programmer Analyst - Analysed requirements and translated them into technical design and Java implementation. - Developed web pages using JSP and controllers using Spring Boot and Spring MVC. - Implemented the persistence layer with Hibernate and Spring JPA. - Used Log4j for logging and tracing messages; performed unit testing using JUnit. - Fixed defects raised during testing and followed Waterfall and Agile delivery practices.

Key Projects

Software Developer

Java · Spring Boot
Hibernate · AWS

EVGateway – EV Charging Management Platform

- **Platform:** Contributed to EVG-Server, the backend for monitoring and managing EV charging stations, and EVG-Portal, the frontend providing dashboards, accounting and charging statistics.
- **Load Management:** Implemented equal distribution of available power across charging ports to prevent overcapacity and keep EV charging uninterrupted within site power limits.
- **OCPP Service:** Worked on the OCPP server, which implements the industry-standard protocol for communication between EV charging stations and the central management system, enabling connection management, monitoring, reporting and seamless integration.
- **OCPI Service:** Integrated OCPI, which allows different EV charging networks, service providers and operators to easily share data and collaborate.

Full Stack Developer

React JS · Redux
Spring Boot · MongoDB

Cars24 – Vehicle Inventory Management System

- Built a full-stack application to add, update, search and track vehicle inventory.
- Developed a responsive React JS UI with centralised state management using Redux.
- Designed Spring Boot RESTful APIs for inventory CRUD operations, persisting data in MongoDB.
- Integrated frontend and backend via REST APIs; tested with Postman and versioned code with Git.

Education

2019

Hyderabad, India

Bachelor of Technology (B.Tech), *Jawaharlal Nehru Technological University Hyderabad (JNTUH)*

Core Competencies & Strengths

- | | | |
|-----------------------------|------------------------------|--------------------------------|
| • Requirement Analysis | • Backend Development | • REST API Design |
| • Full Stack Development | • Unit & Integration Testing | • CI/CD Pipelines |
| • Code Review | • Production Support | • Agile & Waterfall |
| • Works well under pressure | • Hard-working | • Self-motivated |
| • Good communication skills | • Results-oriented | • Consistently meets deadlines |

Languages

- | | | |
|-----------|----------|---------|
| • English | • Telugu | • Hindi |
|-----------|----------|---------|

Declaration

I, Lokesh Narsing, hereby confirm that the information provided above is true and accurate to the best of my knowledge.
